2002 SURVEY HIGHLIGHTS

From the 2002 University Baccalaureate Graduate Survey (UBGS):

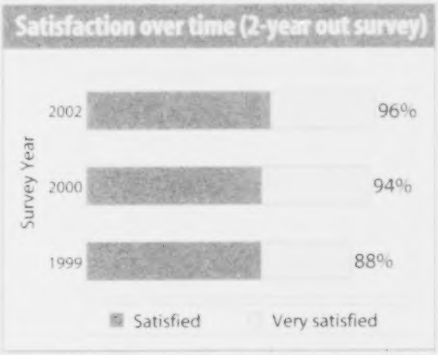
- 96 percent of graduates were satisfied with their education
- 76 percent would take the same program again
- 94 percent of graduates in the labour force were employed two years after university
- Median annual full-time salary for graduates was $40,530
- 53 percent of graduates did not incur debt for their studies
- 87 percent of those who took further education said they were prepared
- 89 percent of those surveyed stayed in British Columbia after graduation

---

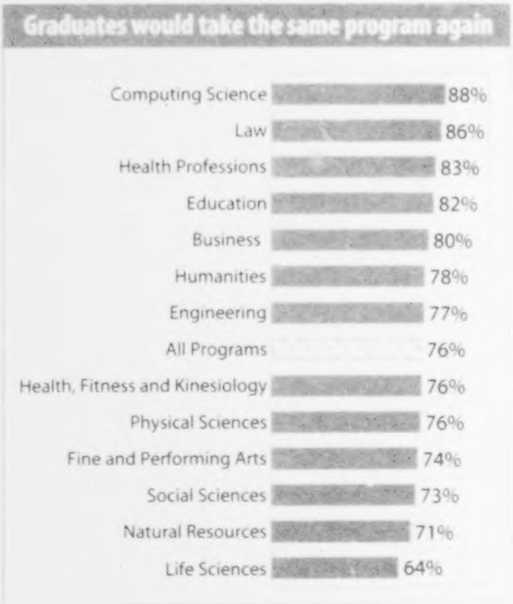
How do graduates rate their university education?

Ninety-six percent of graduates surveyed said they were satisfied or very satisfied with the education they received at university. Further, 96 percent also rated the quality of their course instruction as good or very good, and 90 percent gave the same rating to the core program of required courses they took for their particular field of study.

Surveyed graduates have consistently given very high satisfaction ratings to their university education.



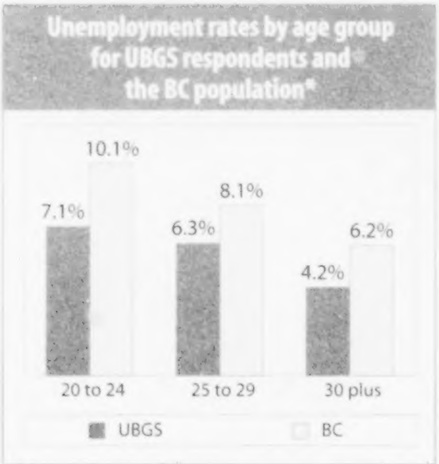
Seventy-six percent of respondents said that they would take the same program again. The percentages of graduates who would take their program again varied by program area, ranging from 64 percent for Life Sciences programs to 88 percent for Computing Science.



What are the employment outcomes for baccalaureate graduates?

At the time of the survey (Fall of 2002), 87 percent of respondents were in the labour force, that is employed or looking for work—94 percent of those in the labour force were employed.

The university baccalaureate graduates surveyed had lower unemployment rates than did the BC population in October of 2002—5.8 percent compared with 7.7 percent. The unemployment rates by age group compare favourably with provincial rates.

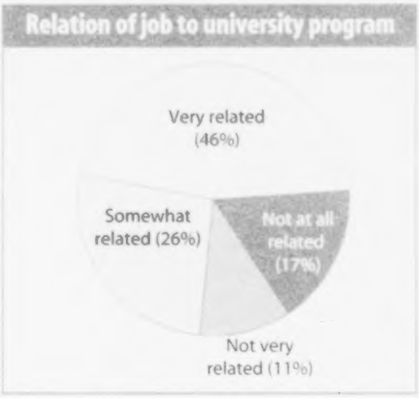


Unemployment rates by age group for UBGS respondents and the BC population*

*From Statistics Canada's Labour Force Survey, Oct. 2002.

Of those who were employed, 78 percent were working full-time. Female graduates were more likely than male graduates to work part-time (26 to 14 percent). Approximately 9 percent of working respondents were self-employed or had earnings from self-employment, and 19 percent had more than one job.

A majority of survey respondents (72 percent) said that their job was very or somewhat related to the program they had taken at university.

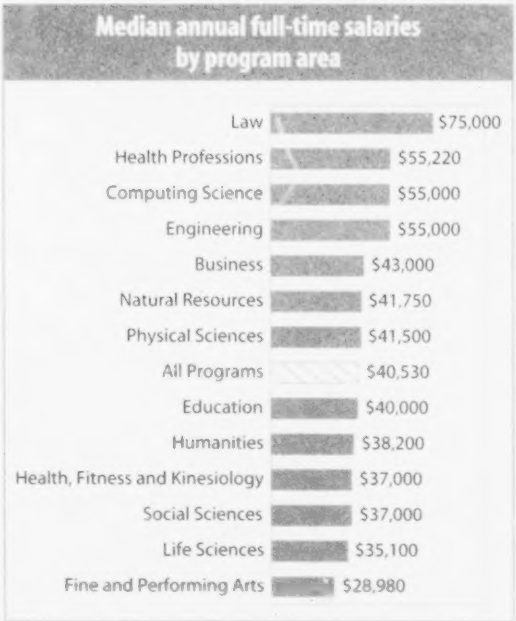


Relation of job to university program

What are graduates' employment earnings?

Two years after graduation, the average annual salary for respondents employed full-time was $44,680. This was higher than the 2002 average annual wage for workers employed full-time in BC, which was $39,926. (Derived from the Statistics Canada Labour Force Survey: Provincial Comparison – Average Weekly Wage Rate, 2002.)

There was a considerable range across program areas in the full-time earnings of respondents. The median annual salary for law graduates was the highest, at $75,000.

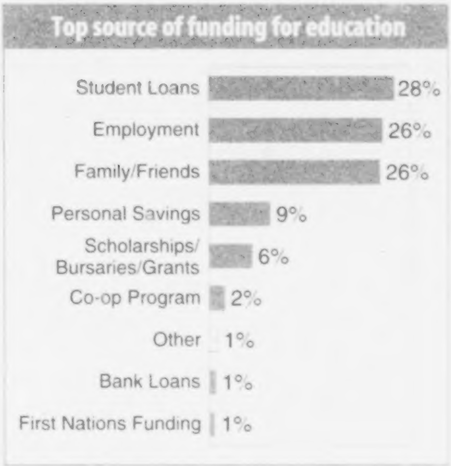


Median annual full-time salaries by program area

How did graduates finance their university education?

Over half (53 percent) of graduates surveyed reported being debt free at the completion of their education program. For those who borrowed, the main source of funds was government student loans, with 40 percent of all respondents reporting that they had taken out a student loan for their studies. The average student loan amount was $17,890. By the time of the survey, the percentage of respondents with student loan debt had dropped to 31 percent—the average amount of their remaining debt was lower as well, at $16,510.

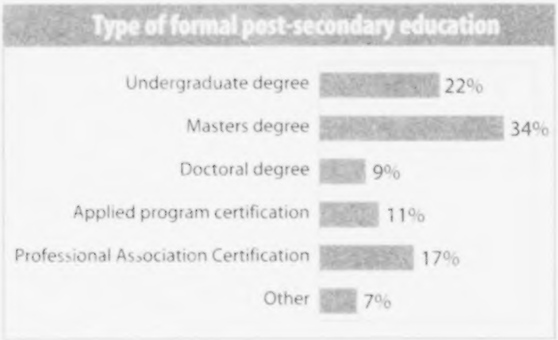
Twenty-eight percent of respondents said that student loans had been the primary source of funding for their education; employment or friends and family were the next most-often cited top sources.



Top source of funding for education

How many graduates pursue further education?

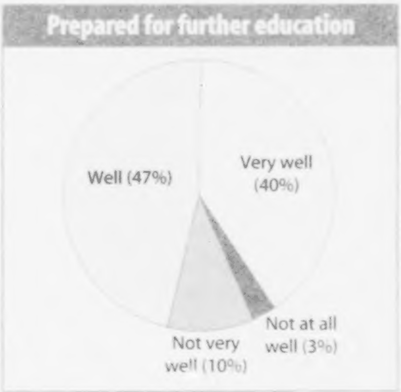
At the time of the survey, 32 percent of graduates were enrolled in formal post-secondary education or training. Of these respondents, 43 percent were working toward a Masters or Doctoral Degree.



Type of formal post-secondary education

A large majority (87 percent) of the graduates who went on to further studies said they felt prepared by their baccalaureate degree program.

In the two years since they left their university program 79 percent of graduates had taken some form of further education or training, including programs, courses, workshops, seminars, correspondence, or tutorials.



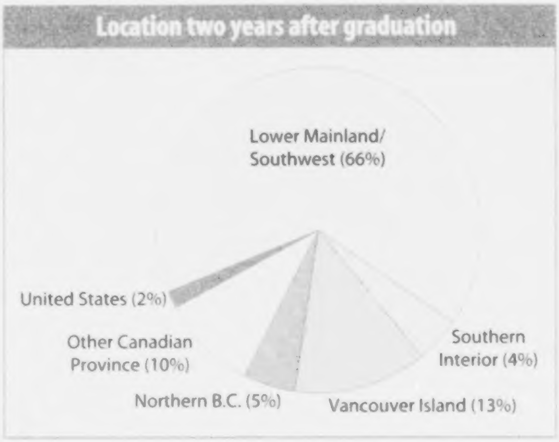
Prepared for further education

Do graduates stay in British Columbia after university?

Two-thirds of the graduates interviewed in 2002 were living in the Lower Mainland area of British Columbia at the time of the survey. Approximately 10 percent of graduates had moved to other provinces—4 percent each to Alberta and Ontario. Just under 2 percent of survey respondents were in the United States; however, it is possible that this is an underestimation, given that it is difficult to contact former students who move after they graduate.

The graduates who left BC had similar employment rates to those who stayed, but they were somewhat less likely to be in the labour force: 81 versus 87 percent. This may be partly explained by the fact that a higher proportion, 38 percent, were enrolled in further studies, compared with 31 percent of those who remained in BC.

Graduates from Law programs were the most likely to leave BC (26 percent left), followed by Physical Sciences graduates (21 percent) and Engineering graduates (16 percent).



Location two years after graduation

About the *2002 Survey Highlights*

The *2002 Survey Highlights* provides a summary of key findings from the 2002 BC University Baccalaureate Graduate Survey. This survey was conducted in the fall of 2002 with baccalaureate graduates from the year 2000.

Out of 11,321 graduates eligible for surveying, 7,389 were interviewed, resulting in a net response rate of 65 percent. The survey was conducted under the auspices of the BC University Student Outcomes Project—a long-term research project dedicated to gathering student outcomes information for BC's universities and the Province of British Columbia. The universities, The University Presidents' Council (TUPC), and the Ministry of Advanced Education collaborate on the project, which is funded by the Ministry and managed under TUPC contract by the Centre for Education Information.

Since 1995 the project has been tracking outcomes of baccalaureate graduates from BC's public universities. The participants are University of British Columbia, Simon Fraser University, University of Victoria, University of Northern British Columbia, and Royal Roads University. Graduates are surveyed by telephone both two and five years after their graduation and are asked to report their level of program satisfaction, degree of skill development, education financing, and employment and further education outcomes.

The *2002 Survey Highlights* is available on the Internet from The University Presidents' Council of BC: http://www.tupc.bc.ca/ . In addition to the highlights, a number of reports are available for each survey year.

See http://www.tupc.bc.ca/student_outcomes/publications/graduate_outcomes/ for Summary Reports by Program Classification, Detailed Reports by Discipline, and analytical reports.

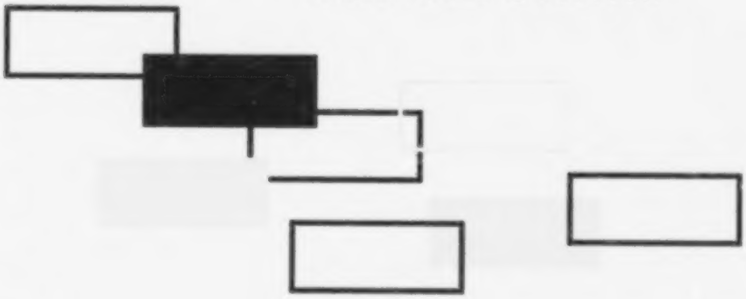
2002 BC University Baccalaureate Graduate Survey:
Summary of Survey Results by Program Classification

Section A: Overview



About the University Student Outcomes Project

Since 1995, British Columbia's public universities have been tracking baccalaureate graduates, both two and five years after graduation,* through the University Baccalaureate Graduate Survey. Information about graduates' education satisfaction and financing as well as further education and employment outcomes are gathered through the survey. Five universities are currently participating in the project:

- University of British Columbia
- Simon Fraser University
- University of Victoria
- University of Northern British Columbia
- Royal Roads University

The universities, together with The University Presidents' Council and the Ministry of Advanced Education collaborate on the project. The project is funded by the Ministry of Advanced Education and managed under contract by the Centre for Education Information Standards and Services.

Objectives of the BC University Baccalaureate Graduate Survey (UBGS)

The UBGS has been designed to gather information on graduates' education satisfaction levels, education financing and student debt, as well as further education and employment outcomes. The purpose for gathering these data is:

- to meet the demand for university accountability at the system level in BC
- to gather timely and relevant data for use in program evaluation and planning processes
- to ensure that new, continuing, and prospective students are provided with information they can use to help them make informed career decisions

The above goals are met through timely and thoughtful data collection, data management, and outcomes reporting. In 2000, a relational database was constructed to house UBGS data. A rigorous data validation routine, also implemented that year, checks and standardizes the data ensuring accuracy and integrity over time. Both the two-year and the five-year UBGS survey instruments contain a core set of standardized questions—accurate, standardized questions stored in a central database work to maximize the data reporting potential of the project and make it possible to conduct trend analysis of the data. Finally, the addition of a special-questions section provides for the opportunity to conduct research into specific issues or topics of interest.

The questionnaire sections are:

1. Core Questions
   - Reasons for Enrolling and Education Satisfaction
   - Education Evaluation and Skill Development
   - Participation in Further Education
   - Labour Market Participation
   - Education Financing and Debt Load
   - Demographics and Equity
2. Special Questions

*exception: 1996 graduates were surveyed 1 year and 5 years after graduation

The Purpose of this Report

The following report presents summary survey results—by program classification and by institution—from the survey conducted in the fall of 2002 with baccalaureate graduates two years after graduation. From the total survey cohort of 12,798 graduates, 7,389 responded to the survey, representing a gross response rate of 58 percent. International students, medical and dental students, and students living outside of North America were excluded from the survey frame.

The results presented in this report are displayed in a two-page template format by program classification for each university and for all universities combined. The following core information is presented for each of the 13 program classification groupings (see Appendix A to review program groupings):

- Respondent Demographics
- Education Satisfaction
- Further Education Summary
- Education Financing
- Debt Load
- Employment Summary
- Labour Force Occupation and Salary Details
- Skill Development

Labour force occupation and salary data are not shown in cases where n<2 (or, for UBC, where n<5), to ensure that no respondent may be uniquely identified. Program and occupational classification details and definitions, as well as detailed response frequency tables by institution and program area, can be found in the appendices at the back the report. Table 1 lists response rate information by institution:

Table 1: 2002 University Baccalaureate Graduate Survey Response Rates, by Institution

Institution	Survey Cohort	Out of Scope	Valid Net Frame	Unable to Interview	Refusals	Respondents	Gross Response Rate	Valid Response Rate

2002 BC University Baccalaureate Graduate Survey: Summary of Survey Results by Program Classification

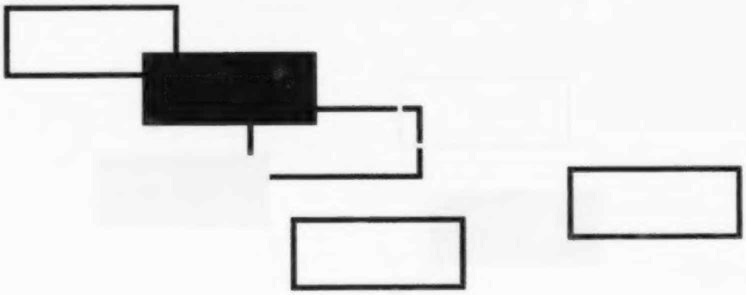
Section C: Appendices



Appendix A

Classification of Instructional Program (CIP)

The Classification of Instructional Programs (CIP) provides a comprehensive and detailed standard for reporting graduate outcomes by program area. This classification system has been adopted by Statistics Canada and many other government reporting agencies in the United States.

The CIP coding scheme is organized on three levels: 2-digit series, 4-digit series, and 6-digit program code. The 2-digit series is a logical grouping of related programs. The 4-digit series is an intermediate aggregation of programs with comparable program content and objectives. The 6-digit program code is the most detailed program classification within the classification system and represents a single instructional program.

Example:
The 6-digit CIP code for Biochemistry is 26.0202.
The 4-digit intermediate aggregation is Biochemistry, Biophysics and Molecular Biology (26.02).
The 2-digit logical grouping is Biological and Biomedical Sciences (26).

Before 2000, B.C. university graduate survey results were classified into one of eight different program areas, independent of the CIP coding structure. These program areas included Arts, Applied Sciences, Business, Education, Fine and Performing Arts, Health, Science, and Social Professions. Starting with the 2000 survey results, the University Student Outcomes Project has classified the respondents according to the CIP coding scheme. For this report, the 2-digit logical groupings have been further aggregated into fifteen Program Classifications to reduce the total number of program areas and to increase the number of respondents in any one program area. Of the fifteen Program Classifications created, thirteen are reported. Table 1 describes the aggregation of 2-digit CIP's into the fifteen USOP Program Classifications.

Table 1: USOP Program Classification Scheme
Derived from an Aggregation of 2-Digit CIP s

USOP Program Classification	Description	2-digit CIP
Business	Marketing Operations/Marketing and Distribution	08
	Business Management and Administrative Services	52
Computing Science	Computer and Information Sciences	11
Education	Education	13
Engineering	Engineering	14

Appendix D contains more detailed information on response frequencies by institution and program area, including gross and valid response rates.

The following pages detail, by university, the way in which individual programs were aggregated into program areas for reporting purposes.

Appendix A

Classification of Instructional Program (CIP)

The Classification of Instructional Programs (CIP) provides a comprehensive and detailed standard for reporting graduate outcomes by program area. This classification system has been adopted by Statistics Canada and many other government reporting agencies in the United States.

The CIP coding scheme is organized on three levels: 2-digit series, 4-digit series, and 6-digit program code. The 2-digit series is a logical grouping of related programs. The 4-digit series is an intermediate aggregation of programs with comparable program content and objectives. The 6-digit program code is the most detailed program classification within the classification system and represents a single instructional program.

Example:
The 6-digit CIP code for Biochemistry is 26.0202.
The 4-digit intermediate aggregation is Biochemistry, Biophysics and Molecular Biology (26.02).
The 2-digit logical grouping is Biological and Biomedical Sciences (26).

Before 2000, B.C. university graduate survey results were classified into one of eight different program areas, independent of the CIP coding structure. These program areas included Arts, Applied Sciences, Business, Education, Fine and Performing Arts, Health, Science, and Social Professions. Starting with the 2000 survey results, the University Student Outcomes Project has classified the respondents according to the CIP coding scheme. For this report, the 2-digit logical groupings have been further aggregated into fifteen Program Classifications to reduce the total number of program areas and to increase the number of respondents in any one program area. Of the fifteen Program Classifications created, thirteen are reported. Table 1 describes the aggregation of 2-digit CIP's into the fifteen USOP Program Classifications.

Table 1: USOP Program Classification Scheme
Derived from an Aggregation of 2-Digit CIP's

USOP Program Classification	Description	2-digit CIP
Business	Marketing Operations/Marketing and Distribution	08
	Business Management and Administrative Services	52

The following pages detail, by university, the way in which individual programs were aggregated into program areas for reporting purposes.

University of British Columbia

1. Fine and Performing Arts

Includes Programs in the Following Discipline(s):

Arts History
Bachelor of Music
Bachelor of Music - Major: Composition
Bachelor of Music - Major: Music Theory
Bachelor of Music - Major: Orchestral Instr.
Film & TV Studies
Fine Arts
Music
Opera
Piano
Studio Arts
Theatre
Voice

2. Computing Science

Includes Programs in the Following Discipline(s):

Computer Science

3. Engineering

Includes Programs in the Following Discipline(s):

Bioresource Engineering
Chemical Engineering
Civil Engineering
Electrical Engineering
Engineering Physics
Geological Engineering
Mechanical Engineering
Met. & Mat. Engineering
Mining & Mineral Preng.

4. Education

Includes Programs in the Following Discipline(s):

Bachelor of Education

5. Law

Includes Programs in the Following Discipline(s):

Bachelor of Law

6. Health Professions

Includes Programs in the Following Discipline(s):

Dental Science
Medical Lab Science
Nursing
Occupational Therapy
Pharmacy
Physical Therapy
Speech Science

7. Health, Fitness and Kinesiology

Includes Programs in the Following Discipline(s):

Bachelor of Human Kinetics
Exercise Science
Human Kinetics - Major: Health & Fitness
Human Kinetics - Major: Instruction & Coaching
Human Kinetics - Major: Leisure & Sports Management
Human Kinetics - Major: No Program Specified
Human Kinetics - Major: Physical Education

8. Business

Includes Programs in the Following Discipline(s):

Accounting
Bachelor of Commerce - Major: General Business
Commerce and Economics
Finance
Industrial Relations
International Business
Managmt Information Systems
Marketing
Transport & Logistics
Urban Land Economy

9. Natural Resources and Agriculture

Includes Programs in the Following Discipline(s):

Bach of Science (Natural Resource Conservation)
Bach of Science (Wood Products Processing)
Bachelor of Science (Agriculture)
Bachelor of Science in Forestry
Environmental Science

10. Social Sciences

Includes Programs in the Following Discipline(s):

Anthropology
Classical Archaeology
Economics
Family Science
Geography
History/ International Relations
History
Home Economics
International Relations
Physical Geography
Political Science
Psychology
Sociology
Social Work

11. Humanities

Includes Programs in the Following Discipline(s):

Asian Area Studies
Canadian Studies
Chinese
Classical Studies
Creative Writing
English
First Nations Languages
French
General Programme
German
Italian Studies
Japanese
Latin American Studies
Linguistics
Modern European Studies
Philosophy
Religion / Lit
Religious Studies
Spanish
Women's Studies

12. Life Sciences

Includes Programs in the Following Discipline(s):

Bachelor of Applied Science
Bachelor of Science (Dietetics)
Biochemistry
Biology
Integrated Sciences
Life Sciences
Microbiology
Nutritional Sciences
Pharmacology & Therapeutic
Physiology

13. Physical Sciences

Includes Programs in the Following Discipline(s):

Astronomy
Atmospheric Science
Chemistry
Geological Science
Geophyics
Hydrogeology
Management Information Systems
Mathematical Science
Mathematics
Oceanography
Physics
Statistics

Simon Fraser University

1. Fine and Performing Arts

Includes Programs in the Following Discipline(s):

- Art and Culture Studies
- Dance
- Film
- Music
- Theatre
- Visual Arts

2. Computing Science

Includes Programs in the Following Discipline(s):

- Computing Science

3. Engineering

Includes Programs in the Following Discipline(s):

- Engineering Science

4. Education

Includes Programs in the Following Discipline(s):

- Bachelor of Education
- Professional Development Program

7. Health, Fitness and Kinesiology

Includes Programs in the Following Discipline(s):

- Kinesiology

8. Business

Includes Programs in the Following Discipline(s):

- Actuarial Science
- Business Administration
- Management & Systems Science

9. Natural Resources and Agriculture

Includes Programs in the Following Discipline(s):

- Environmental Science

10. Social Sciences

Includes Programs in the Following Discipline(s):

- Anthropology
- Archaeology
- Cognitive Science
- Communication
- Criminology
- Economics
- Geography
- History
- Physical Geography
- Political Science
- Psychology
- Sociology

11. Humanities

Includes Programs in the Following Discipline(s):

- Canadian Studies
- English
- French
- Humanities
- Latin American Studies
- Linguistics
- Philosophy
- Russian
- Spanish
- Women's Studies

12. Life Sciences

Includes Programs in the Following Discipline(s):

- Biochemistry
- Biological Sciences

13. Physical Sciences

Includes Programs in the Following Discipline(s):

- Applied Mathematics
- Chemistry
- Earth Sciences
- Mathematics
- Physics
- Statistics

University of Victoria

1. Fine and Performing Arts

Includes Programs in the Following Discipline(s):

Bachelor of Fine Arts - Writing
Bachelor of Music
Bachelor of Music - Major: Composition + Theory
Bachelor of Music - Major: Performance
Film Studies
History in Art
Music Education
Theatre
Visual Arts

2. Computing Science

Includes Programs in the Following Discipline(s):

Computer Science
Computer Science / Math

3. Engineering

Includes Programs in the Following Discipline(s):

Computer Engineering
Electrical Engineering
Mechanical Engineering

4. Education

Includes Programs in the Following Discipline(s):

Bachelor of Education

5. Law

Includes Programs in the Following Discipline(s):

Bachelor of Law

6. Health Professions

Includes Programs in the Following Discipline(s):

Health Information Science
Nursing

7. Health, Fitness and Kinesiology

Includes Programs in the Following Discipline(s):

Kinesiology
Leisure Service Administration

8. Business

Includes Programs in the Following Discipline(s):

Bachelor of Commerce

9. Natural Resources and Agriculture

Includes Programs in the Following Discipline(s):

Environmental Studies

10. Social Sciences

Includes Programs in the Following Discipline(s):

Anthropology
Child and Youth Care
Economics
Geography
History
Political Science
Psychology
Social Work
Sociology

11. Humanities

Includes Programs in the Following Discipline(s):

- Applied Linguistics
- Bachelor of Arts - Writing
- Chinese Studies
- English
- French
- German
- Greek+Roman Studies
- Hispanic Studies
- Italian Studies
- Japanese Studies
- Linguistics
- Medieval Studies
- Pacific Studies
- Philosophy
- Russian
- Women's Studies

12. Life Sciences

Includes Programs in the Following Discipline(s):

- Biology
- Biochemistry
- Microbiology

13. Physical Sciences

Includes Programs in the Following Discipline(s):

- Astronomy
- Chemistry
- Earth Sciences
- Mathematics
- Physics
- Statistics

University Of Northern British Columbia

2. Computer Science

Includes Programs in the Following Discipline(s):

Computer Science

6. Health Professions

Includes Programs in the Following Discipline(s):

Nursing

8. Business

Includes Programs in the Following Discipline(s):

Accounting
Finance
General Business
International Business
Marketing
Resource-Based Tourism

9. Natural Resources and Agriculture

Includes Programs in the Following Discipline(s):

Environmental Planning
Environmental Science
Environmental Studies
NRM - Fisheries
NRM - Forestry
NRM - Resource Recreation
NRM - Wildlife

10. Social Sciences

Includes Programs in the Following Discipline(s):

Anthropology
Economics
Geography
History
International Studies
Political Science
Psychology
Social Work

11. Humanities

Includes Programs in the Following Discipline(s):

English
Bachelor of Arts (General)
First Nations Studies

Royal Roads University

8. Business

Includes Programs in the Following Discipline(s):

Entrepreneurial Management

9. Natural Resources and Agriculture

Includes Programs in the Following Discipline(s):

Bachelor of Science in Environmental Science

Appendix B

The National Occupational Classification (NOC)

From the document, National Occupational Classification 2001, Occupational Descriptions, *published by Human Resources Development Canada.*

The National Occupational Classification (NOC) is a systematic taxonomy of occupations in the Canadian labour market. It is based on extensive occupational research, analysis, and consultation conducted across the country. The NOC is intended for use in compiling, analysing, and communicating information about occupations. There are over 30,000 occupational titles included in the NOC.

The two major attributes of jobs which were used as classification criteria in developing the NOC were skill level and skill type.

1. Skill Level is defined generally as the amount and type of education and training required to enter and perform the duties of an occupation. Four skill level categories are identified in the NOC; the criteria for each level are as follows:

Skill Level A	Professional Occupations • University degree (bachelor's, master's or doctorate)
Skill Level B	Technical, Paraprofessional, and Skilled Occupations • Two to three years of post-secondary education at a community college, institute of technology, or CEGEP *or* • Two to four years of apprenticeship training *or* • Three to four years of secondary school and more than two years of on-the-job training, occupation-specific training courses, or specific work experience • Occupations with supervisory responsibilities are assigned to skill level B • Occupations with significant health and safety responsibilities (e.g., fire fighters, police officers, and licensed practical nurses) are assigned to skill level B
Skill Level C	Intermediate Occupations • One to four years of secondary school education • Up to two years of on-the-job training, training courses, or specific work experience
Skill Level D	Labouring and Elemental Occupations • Short work demonstration or on-the-job training *or* • No formal educational requirements

Management occupations are not assigned to a skill level category because factors other than education and training (e.g., previous experience, capital) are often more significant determinants for employment.

2. Skill Type is defined generally as the type of work performed. Ten broad occupational categories, based on skill type, are identified in the NOC:

0. Management Occupations
   - legislators, senior management, and middle and other management occupations
1. Business, Finance, and Administration
   - providing financial and business services, administrative and regulatory services and clerical supervision and support services
2. Natural and Applied Sciences and Related Occupations
   - professional and technical occupations in the sciences, including physical and life sciences, engineering, architecture, and information technology
3. Health Occupations
   - occupations providing health care services to patients and occupations providing support to professional and technical staff
4. Occupations in Social Science, Education, Government Service, and Religion
   - occupations concerned with law, teaching, counselling, conducting social science research, developing government policy, and administering government and other programs
5. Occupations in Art, Culture, Recreation, and Sport
   - professional and technical occupations related to art and culture (including performing arts, film and video, broadcasting, journalism, writing, creative design, libraries and museums) and occupations in recreation and sport
6. Sales and Service
   - sales occupations, personal and protective services, and occupations related to hospitality and tourism
7. Trades, Transport, and Equipment Operators and Related Occupations
   - includes construction and mechanical trades, trades supervisors and contractors, and operators of transportation and heavy equipment
8. Occupations Unique to Primary Industry
   - supervisory and equipment operation occupations in mining, oil and gas production, forestry and logging, agriculture, horticulture, and fishing
9. Occupations Unique to Processing, Manufacturing, and Utilities
   - supervisory and production occupations in manufacturing, processing, and utilities

SKILL LEVEL A Occupations usually require university education.	**Major Group 11** PROFESSIONAL OCCUPATIONS IN BUSINESS AND FINANCE 111 Auditors, Accountants and Investment Professionals 112 Human Resources and Business Service Professionals	**Major Group 21** PROFESSIONAL OCCUPATIONS IN NATURAL AND APPLIED SCIENCES 211 Physical Science Professionals 212 Life Science Professionals 213 Civil, Mechanical, Electrical and Chemical Engineers 214 Other Engineers 215 Architects, Urban Planners and Land Surveyors 216 Mathematicians, Statisticians and Actuaries 217 Computer and Information Systems Professionals	**Major Group 31** PROFESSIONAL OCCUPATIONS IN HEALTH 311 Physicians, Dentists and Veterinarians 312 Optometrists, Chiropractors and Other Health Diagnosing and Treating Professionals 313 Pharmacists, Dietitians and Nutritionists 314 Therapy and Assessment Professionals 315 Nurse Supervisors and Registered Nurses	**Major Group 41** PROFESSIONAL OCCUPATIONS IN SOCIAL SCIENCE, EDUCATION, GOVERNMENT SERVICES AND RELIGION 411 Judges, Lawyers and Quebec Notaries 412 University Professors and Assistants 413 College and Other Vocational Instructors 414 Secondary and Elementary School Teachers and Educational Counsellors 415 Psychologists, Social Workers, Counsellors, Clergy and Probation Officers 416 Policy and Program Officers, Researchers and Consultants
SKILL LEVEL B Occupations usually require college education or apprenticeship training.	**Major Group 12** SKILLED ADMINISTRATIVE AND BUSINESS OCCUPATIONS 121 Clerical Supervisors 122 Administrative and Regulatory Occupations 123 Finance and Insurance Administrative Occupations 124 Secretaries, Recorders and Transcriptionists	**Major Group 22** TECHNICAL OCCUPATIONS RELATED TO NATURAL AND APPLIED SCIENCES 221 Technical Occupations in Physical Sciences 222 Technical Occupations in Life Sciences 223 Technical Occupations in Civil, Mechanical and Industrial Engineering 224 Technical Occupations in Electronics and Electrical Engineering 225 Technical Occupations in Architecture, Drafting, Surveying and Mapping 226 Other Technical Inspectors and Regulatory Officers 227 Transportation Officers and Controllers 228 Technical Occupations in Computer and Information Systems	**Major Group 32** TECHNICAL AND SKILLED OCCUPATIONS IN HEALTH 321 Medical Technologists and Technicians (Except Dental Health) 322 Technical Occupations in Dental Health Care 323 Other Technical Occupations in Health Care (Except Dental)	**Major Group 42** PARAPROFESSIONAL OCCUPATIONS IN LAW, SOCIAL SERVICES, EDUCATION AND RELIGION 421 Paralegals, Social Services Workers and Occupations in Education and Religion, n.e.c.
SKILL LEVEL C Occupations usually require secondary school and/or occupation-specific training.	**Major Group 14** CLERICAL OCCUPATIONS 141 Clerical Occupations, General Office Skills 142 Office Equipment Operators 143 Finance and Insurance Clerks 144 Administrative Support Clerks 145 Library, Correspondence and Related Information Clerks 146 Mail and Message Distribution Occupations 147 Recording, Scheduling and Distributing Occupations		**Major Group 34** ASSISTING OCCUPATIONS IN SUPPORT OF HEALTH SERVICES 341 Assisting Occupations in Support of Health Services	
SKILL LEVEL D On-the-job training is usually provided for occupations.				

continued on next page

The National Occupational Classification (NOC) matrix provides an overview of the classification at the minor group level. It also illustrates how the NOC is accessible on the basis of skill level, skill type, or on a combination of these two criteria. The four skill level categories are listed on the left side of the matrix, while nine skill type categories are listed across the top. The tenth skill type category (0 Management Occupations) is organized across the top of the matrix. In most cases, each matrix cell consists of a major group.

5 OCCUPATIONS IN ART, CULTURE, RECREATION AND SPORT	6 SALES AND SERVICE OCCUPATIONS	7 TRADES, TRANSPORT AND EQUIPMENT OPERATORS AND RELATED OCCUPATIONS	8 OCCUPATIONS UNIQUE TO PRIMARY INDUSTRY	9 OCCUPATIONS UNIQUE TO PROCESSING, MANUFACTURING AND UTILITIES

Appendix E

Technical Notes Relating to the Reports

Unless otherwise noted, denominators for the percentages provided in the reports include only cases where a valid response was provided (i.e., "Don't Know" and "Refused" responses have been excluded). However, percentages provided may not always add up to one hundred percent, due to rounding.

Respondent Demographics

***Current Residence* –** Cases where the current residence is unknown are not reported in this graph. The denominator for this element is the total number of respondents for whom current residential data are available.

Education Satisfaction

***Quality of Course Instruction; Quality of Core Program of Required Courses* –** Percentages cited are of those who provided valid responses.

Further Education Summary

***Type of Further Education Taken* –** Percentages cited are of those respondents who were currently enrolled in formal post-secondary education at the time of the survey.

Education Financing

***Top 3 Main Sources of Education Financing* –** Where respondents cited more than one source, "main" source was considered to be that with the highest specified percentage of importance. Where equal percentages of importance were specified, the source cited first was considered the "main" source.

Employment Summary

***In the Labour Force* –** Includes respondents who are either currently employed or are actively seeking employment.

***Of those employed* –** Full-time and part-time percentages are of employed respondents who provided data on number of hours worked.

For More Information
